

# Environment Sustainability Commitment Statement

At TAFE NSW - South Western Sydney Institute (SWSi), we acknowledge our responsibility to raise awareness and understanding of environmental sustainability amongst staff and students to apply sustainability into practice in the workplace, learning environment and broader community.

SWSi is committed to achieve its goal to be recognised as an exemplar of environmental best practices and a sustainable organisation.

We are committed to:

- Reduce waste and increase recycling and reuse;
- Embed sustainability principles and practices in all aspects of our operations;
- Provide training for the low carbon economy by incorporating green skills and skills for sustainability to meet the needs of industry and community;
- Engage actively with staff, students, stakeholders, suppliers, industry partners and community organisations to build their environmental sustainability capabilities contribute positively to the environment;
- Minimise our environmental footprint through sustainable management of our resources including land, water, energy, materials, cultural heritage and biodiversity;
- Showcase leadership and innovation in the field of environment sustainability.
